# Trustwave Fusion

▶ UNIFIED CYBERSECURITY PLATFORM

Benefits

- Complete visibility and centralized control
- Support for multi-cloud and diverse environments
- Access to Trustwave SpiderLabs Global Threat Intelligence
- Aggregation of third party data and products
- Hybrid Security Operations
- Deep insights through advanced reporting

Trustwave Fusion is a cloud-native platform that gives enterprises unprecedented visibility and control over how security and resources are provisioned, monitored, and managed across any environment. Consolidating Trustwave people, processes and technology into an intuitive application, our platform delivers the ability to manage complex security programs from a computer, tablet or mobile phone.

Trustwave Fusion Platform

The Trustwave Fusion platform connects your organization's digital footprint to a robust security cloud comprised of the Trustwave data lake, advanced analytics, actionable threat intelligence and a wide range of Trustwave services including Trustwave SpiderLabs®, elite team of security specialists. Your team will benefit from deep visibility and the advanced security expertise necessary for protecting assets and eradicating threats as they arise.

Services Available within the Trustwave Fusion Platform

Managed Security Services

Threats are growing more hostile, the number of endpoints needing to be controlled are rising, budgets are tight and in-house resources devoted to security are at a premium. Powered by global threat intelligence from the elite Trustwave SpiderLabs team, our comprehensive catalog of flexible Managed Security Services help you protect against advanced threats, diminish your attack surface, identify new risks, and respond to and recover from incidents. Trustwave Fusion easily integrates with your security eco-system whether on-premise or in the cloud to provide detection, investigation, response and protection across your business. It provides unprecedented visibility into your threat, vulnerability and compliance posture and access to metrics, assets, findings and reports across the entire infrastructure. On top of that, it empowers you to make decisions and take action – at the click of a button – to combat breaking threats.

Security Testing

Trustwave Fusion is the platform for Trustwave Security Testing Suite. Given today's complex, distributed and fluid IT environments, it's difficult for organizations to view enterprise risk holistically. Using Trustwave Security Testing Suite, you can schedule unlimited discovery scans to identify and map out your organization's assets and categorize them by location, function, and/or importance. You have the power to enroll your testing targets directly into the testing platform, monitor your security posture, schedule tests and view findings at your convenience, enabling you to easily follow the best practices in security testing. Trustwave security testing services are powered by Trustwave SpiderLabs® — an advanced security team focused on forensics, ethical hacking and application security testing. Lessons learned through the thousands of manual assessments and millions of scans per year are continuously put into practice to offer the greatest value for your security spend.

Key Features

- **Customizable Dashboard** View summaries of activity and security status. Create multiple dashboards tailored to your needs.
- **Combined Findings** Understand your full security posture with combined threat and vulnerability findings. Drill down into details for individual findings.
- **Search Assets, Findings, Data Search** Allow users to quickly get access to the data needed. This includes the ability to search log data received from various devices.
- **Managed Asset View** View details about devices under management including their current and historical status.
- **Support Area with Chat** Get support via chat and get increased visibility into security incidents and device/technology management related tickets.

Trustwave SpiderLabs®

Trustwave SpiderLabs is an elite group of researchers, penetration testers and incident responders. By applying our proprietary research and insight from thousands of incident response investigations, penetration tests and other security research, Trustwave provides security insight and threat intelligence that you can't get anywhere else.
