

Trustwave Managed Security and Compliance Service

SECURE NETWORKING SERVING HOSPITALITY, RETAIL AND BANKING INDUSTRIES

Benefits

- Maximize investments and mitigate risks with consistent operations
- Improve safeguards for your customers' credit cards and personally identifiable information (PII)
- Remove weak links in back-office processes and your supply chain to help neutralize hackers
- Simplify PCI DSS compliance
- Delight your customers with secure innovative technologies
- Rest assured with comprehensive, resilient, managed security services
- Standardize secure setups across multiple locations
- Improve visibility and control from anywhere with meaningful dashboards
- Access to responsive 24x7 monitoring and support

Cyber attacks can have a material impact not only on revenue but also on brand reputation. The technologies that allow efficient day-to-day operations and guest services (such as credit card processing, supply chain communications and guest Wi-Fi access) can also increase your brand and franchisee business risk. Take control of your network to protect your company, customers, supply chain partners, and brand.

The Trustwave Managed Security and Compliance service can help you (i) reduce cybersecurity risks, (ii) meet complex industry requirements, (iii) stand up secure, highly available networks, and (iv) increase your operational resilience.

Secure, Compliant Networking With 24x7 Expert Management

Trustwave provides you with comprehensive managed security and compliance offerings to secure your business and assess PCI compliance. Designed specifically for the demands of the franchise business model, we make it easy for you to incorporate security, PCI compliance, and network resiliency without disrupting your business focus.

Trustwave offers Managed Security and Compliance service including broadband, Wi-Fi, and backup cellular options, all integrated together with our cloud-based Trustwave Fusion platform for easy monitoring and 24x7 expert support, and while meeting PCI compliance. Whether you need standard validation services or full network security management with redundant connectivity from best-in-class technologies, Trustwave can help you secure your business against cyber threats.

Trustwave Approach

We start by listening to your unique security, compliance, and network management challenges, especially as it relates to your particular industry. After reviewing your current designs and specific industry trends, our guidance can help you:

- Implement best-practice security designs and improve CDE (Card Data Environment) segmentation
- Tailor resilient security and networking offerings to your brand's and franchisees' needs
- Ensure effective operations of your business with market-leading technologies
- Monitor and support 24x7 operations with world-class experts
- Customize a holistic approach to meet or exceed PCI DSS requirements
- Access real-time collaboration and transparency via an intuitive web portal and mobile apps

Why Trustwave

Let Managed Security and Compliance Service help you take advantage of Trustwave's excellent credentials:

- **Significant Experience:** Extensive security experience, understanding of secure network connectivity, and proven delivery of PCI compliance services for over 25 years.
- **Recognized Leader:** Unanimously lauded by industry analysts and globally recognized year after year.
- **Tailored Solutions:** Modular, scalable, secure network management and connectivity offerings tailored to industry-specific needs.
- **Strong Industry Partnerships:** Reliable best-in-class hardware and software solutions from reputable technology partners.

Modular and Flexible Options

Trustwave provides flexible and affordable options to meet your current and evolving business requirements.
