Trustwave Ransomware Readiness Assessment Services

KNOW THE RISK TO YOUR ORGANIZATION

Ransomware is a type of malware designed to block access to a computer system until a sum of money is paid. It is one of the most lucrative methods of cybercrime. Previous generations of ransomware targeted individual users, yet techniques have evolved today, and the focus has shifted to public and private sector organizations. Trustwave helps organizations understand their susceptibility to ransomware attacks and improve their ability to detect attempted intrusions, respond, and recover in a timely and effective manner.

The Trustwave Ransomware Readiness Assessment can be a stand-alone service, or it can be combined with other added value security services, such as a Security Colony Core Subscription and a DFIR Essential Consulting Retainer with Trustwave SpiderLabs.

Ransomware Readiness Assessment

Learn your level of risk of falling victim to a successful ransomware attack and the potential consequences to your organization. An expert Trustwave consultant will meet with your team to gather information on your current security practices, controls, and mitigation strategies. We then measure the maturity of your current controls relevant to a ransomware attack against industry standard frameworks such as NIST Cyber Security Framework (CSF) and using a readiness assessment devised by Trustwave. The output is a summary report with key weaknesses, strengths, and detailed recommendations to further strengthen your security posture.

Trustwave Security Colony

A subscription to the Trustwave Security Colony portal provides access to services to support and improve your security capability in a cost-effective manner. For example, our Resource Library contains documents developed for real clients, and includes design and testing cheat-sheets, security test cases and presentations, forensics and audit guides, templates, policies and more. Access allows you to:

- **Assess Vendor Security:** What security risks do your vendors pose?
- **Monitor Breaches:** Are there breaches containing your information?
- **Assess Your Security Maturity:** How is your security program progressing?
- **Ask a Consultant:** Seek advice from Trustwave for your information security challenges

Trustwave Digital Forensics and Incident Response Retainer

Digital Forensics and Incident Response (DFIR) Essential Consulting Retainer with Trustwave SpiderLabs experts will ensure fast response with highly trained first responders in the event of a security breach. The 12-month DFIR Essential Consulting Retainer helps clients understand unique readiness options, receive ongoing guidance, and gain same-day access to elite cybersecurity experts in the event of a breach or cyber concern.

Trustwave can launch a forensic investigation at a moment's notice with experts stationed all around the globe. Once on retainer, a cybersecurity first responder is ready to determine and contain the root cause of a breach, minimize its impact, preserve key evidence, help guide you through a breach scenario, and give you pragmatic advise.

Advantages of having a Trustwave DFIR retainer in place include:

- **Speed:** Responders are on-call 24x7x365 with 4-8 hour remote response rate
- **Priority:** Retainer cases get immediate priority over emergency service work
- **Lower cost:** Pre-negotiated rates are lower than emergency incident response fees
- **Accessibility:** Access to Trustwave SpiderLabs resources and services to ensure most effective responses
- **Defensibility:** Helps preserve chain of custody evidence in case of a litigation

Available Services

Whether you are looking to get a quick understanding of your resilience to a ransomware attack, or need ongoing guidance and access to security experts, Trustwave offers the following service levels:

Randomsware Readiness Assessment Services	Service Levels		
	Bronze	Silver	Gold
Ransomware Readiness Assessment Report Actionable report featuring current strengths, weaknesses, and detailed recommendations.	●	●	●
Security Colony Core Subscription Access a vast library of real-world solutions from actual Trustwave consulting engagements.		●	●
Essential DFIR Consulting Retainer Trustwave SpiderLabs experts remain for 12 months on standby as your first responders to a security breach.			●

Other Trustwave Services to Help Defend Against Ransomware Attacks

Managed Detection and Response Services

Trustwave provides Managed Detection and Response services, powered by Trustwave Fusion platform and best-in-class Trustwave SpiderLabs threat intelligence and elite threat hunting expertise. The field-proven service excellence and analyst-lauded approach at Trustwave drives consistent and continuous outcomes.

Trustwave Database Security Solutions

Ransomware attacks via malicious phishing attempts are increasingly targeting database programs such as MySQL, MongoDB and Hadoop, to name a few. Trustwave Database Security Solutions help you get ahead of risks to sensitive data so you can respond intelligently, harden your database attack surface, and sustain compliance.

Trustwave Email Security

Email remains a popular attack vector for delivering ransomware. The email content security solution, Trustwave MailMarshal delivers advanced protection against today's sophisticated email-based threats, extensive policy controls, and in-depth data security and compliance management.

Are you experiencing a security breach or ransomware attack?

Contact Trustwave for immediate assistance.
