

DATASHEET

Digital Operational Resilience Act (DORA) & Trustwave

September 2021

Meeting DORA Resilience Standards

A legislation proposed by the European Commission namely DORA which will impact all financial services (FS) companies and their information communications technology (ICT) service providers operating in the European Union. Implementation of this comprehensive framework on digital operational resilience is proposed to ensure that FS companies and critical ICT suppliers are subject to a common set of standards to mitigate ICT risks. This framework is to be negotiated by the EU over the upcoming 12 months.

DORA enables the EU to have a clear foundation for EU financial regulators to expand the focus from financial resilience to making sure FS companies can maintain resilient operations should there be an incident causing operational disruption.

The potential need for ICT service providers to be notified if they are deemed as a critical provider of that service to FS companies and how they can best comply with the framework that is being developed. This includes digital operational resilience testing and ICT incident handling & reporting.

Trustwave services

Trustwave helps financial services firms and critical ICT providers respond to upcoming regulations through a variety of market leading services such as:

Trustwave SpiderLabs® Penetration Testing and Digital Forensics and Incident Response	Cyber Advisory Services	Cyber architecture and Integration services
<p>Regional and global reach collaborating with FS companies world-wide.</p> <p>CREST STAR-FS accredited robust penetration testing function.</p> <p>Continuous research with intelligence and threat led penetration testing and assessments through red teaming to conduct regulatory testing</p> <p>Engagement of qualified professionals that regularly contribute to the MITRE ATT&CK Framework.</p> <p>Extensive experience in dealing with serious, sophisticated attacks with an effective response to incidents and breaches across the enterprise.</p>	<p>Advise on strategy, governance and security maturity.</p> <p>Enterprise-wide security improvement and capability advisory enabling you to achieve your objectives.</p> <p>For instance, services such as:</p> <ul style="list-style-type: none">• Virtual security advisory• Policy, process & procedure review and creation• Maturity assessments• Security Colony resource library & information sharing	<p>Enterprise-wide transformation and operational enablement</p> <p>Continuous enhancement and improvement of detection and response capabilities</p> <p>For instance, services such as:</p> <ul style="list-style-type: none">• Workshops• Use case development• Playbooks

Trustwave Resources for Financial Services and Critical ICT Providers

Leveraging the global market leading digital resilience capabilities of Trustwave Consulting & Professional Services will ensure your organisation has appropriate controls measured to the risks you face through the following:

Deep technical expertise - ethical hacking, forensic investigations, incident response and security research

Engagement of qualified professionals - regularly contributing to the MITRE ATT&CK Framework, such as this one for [operating system credential dumping](#) and this one [on brute force techniques](#).

Regional and global recognition - recognised regionally and globally by enterprises, cyber security analysts and research community.

Extensive experience in dealing with serious, sophisticated attacks with an effective response to incidents and breaches across the enterprise.

Unrivalled intelligence – real world intelligence from forensics investigations and advanced threat research, including a recent [discovery of a novel malware campaign](#) and new [vulnerabilities with SolarWinds Orion](#).

Cyber resources platform - assess supply chain security, preformatted compliance material, accessible community of contributors.
