# TrustKeeper PCI Manager with the SMB Security Toolkit

## FOR SMALL AND MEDIUM-SIZED BUSINESSES HANDLING PAYMENT CARD DATA

| | | |
|---|---|---|
| **71%** of cyber-attacks occur at businesses with fewer than 100 employees[1] | almost **50%** of cardholders are likely to avoid stores hit by data breaches[2] | **80%** of small businesses that suffer a breach go out of business after 18 months[3] |

Your business may be small but that doesn't mean that it escapes notice from cybercriminals. Cyberattackers seek out small businesses and medium-sized businesses (SMBs) because they know they are often the softest targets. And targeting your business is easier and cheaper than ever before with the rising use of attack automation techniques. In this hostile cyber environment, it's never been more important to shore up your defenses. If your customers' data is leaked, they aren't going to give you a pass and may not come back to do business with you.

## PCI Compliance Made Easy

TrustKeeper® PCI Manager with the SMB Security Toolkit is designed to meet the needs of small businesses like yours. You get the benefit of years of distilled experience from the PCI compliance and security expert in a simple-to-use package that is priced affordably for your small business. You could easily pay seven times more for these same capabilities if you purchased them independently. And you don't have to be an IT expert to install and maintain the tools.

**PCI Manager with the SMB Security Toolkit helps you:**

- Secure your business by providing a comprehensive toolkit that makes it easier to defend against hackers and malware
- Simplify PCI compliance efforts with an automated workflow that reduces the number of questions you have to answer
- Save money with integrated security solutions bundled in to one affordable package

## Benefits

### Simplifies Security and Compliance

PCI Manager with the SMB Security Toolkit makes it simple for you to implement security best practices and certify your Payment Card Industry Data Security Standard (PCI DSS) compliance.

### Cost-effective Security and Compliance Services for SMBs

Our industry-leading security and compliance portal is designed with small businesses in mind, knowing that you may not have a dedicated IT staff and that the PCI DSS may be new to you. PCI Manager with the SMB Security Toolkit will guide you through the process, providing information and resources so you can secure your business simply and affordably.

### Backed by Trustwave Expertise and Trusted Peers

The extensive security and PCI compliance experience that Trustwave has garnered over the years has been re-invested back into PCI Manager to simplify and streamline the process for you. PCI Manager integrates support every step of the way, from quick help to formal online Security Awareness Training courses. You are also supported by a helpdesk team that is trained in PCI available via email, phone or online chat. And you have access to the support of the Trustwave Community – an online social network where you'll be able to interact with other businesses like yours – right from your dashboard.

# You Are Guided Step-by-Step Through the Workflow

## It's Easy to Get Started

Getting started with PCI Manager with the SMB Security Toolkit is easy. Simply visit your program's "Getting Started" page and you'll be guided through the entire process including registration. The workflow begins with understanding some basics about your business and credit card acceptance practices.

If you already have a relationship with a Trustwave partner (e.g. acquiring bank or processor), they may have enrolled you into their program already. If so, you can register your account at https://pci.trustwave.com. If you are already registered, you can log in at https://login.trustwave.com. Check with your merchant service provider or our Trustwave Support team for additional questions.

## Secure Your Business as the First Step

Security is the foundation of compliance. Trustwave offers a number of security solutions to address your business requirements for becoming and staying secure, including managed firewall, SSL certificates, Secure Email Gateway and many more.

Take advantage of the SMB security solutions that are included in your program to defend against hackers and malware. The SMB Security Toolkit is designed to improve your overall security posture by adding additional layers to your defenses and it can also streamline your PCI DSS compliance process.

The full SMB Security Toolkit includes:

- PCI Network Vulnerability Scans (for up to 3 IPs)
- Security Health Check
- Security Configuration Monitoring
- POS Application Detection Module
- Credit Card Data Scanner (DLP)
- Unauthorized Device Monitoring
- File Integrity Monitoring (FIM)

- Trustwave Anti-virus (AV)
- Security Policy Generator
- POS Tracker
- Mobile Device Security
- Remote Access Security
- Web Malware Monitoring

See "PCI Services for Small and Medium-Sized Businesses" at trustwave.com for the description and application of each tool.

## Helping You Manage Security and Streamline Compliance

The experience of using TrustKeeper PCI Manager and the SMB Security Toolkit is simple and efficient. You are guided through the workflow of implementing security best practices and achieving and maintaining compliance.

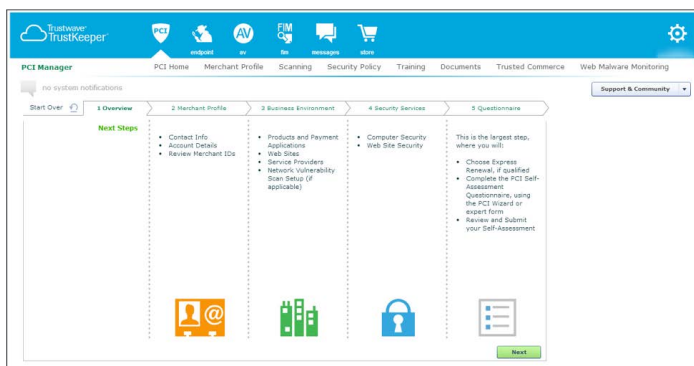

The workflow begins by capturing basic information about your business and business environment.

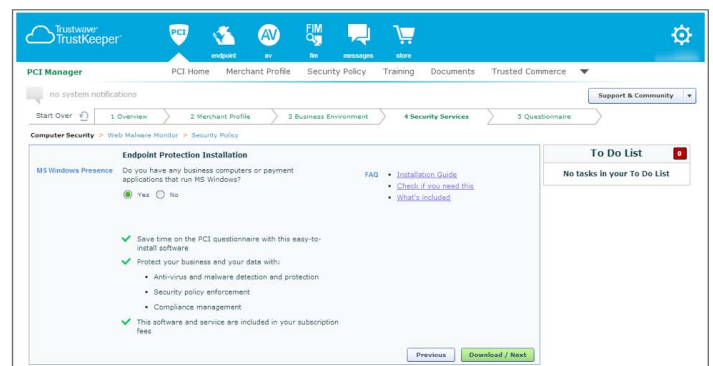

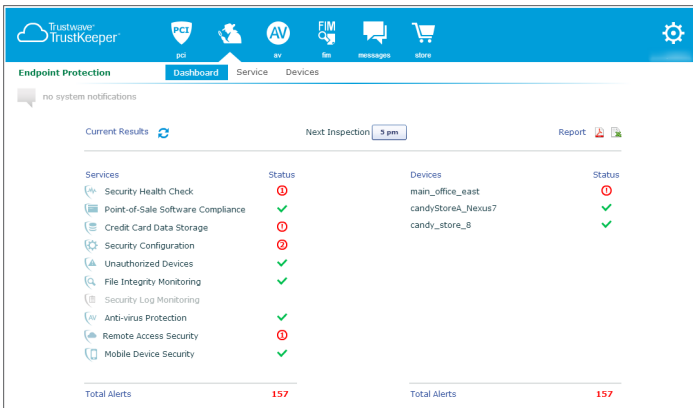

You are prompted to install the security tools that have been integrated in to your program before beginning the questionnaire so that the relevant requirements can be prefilled for you.
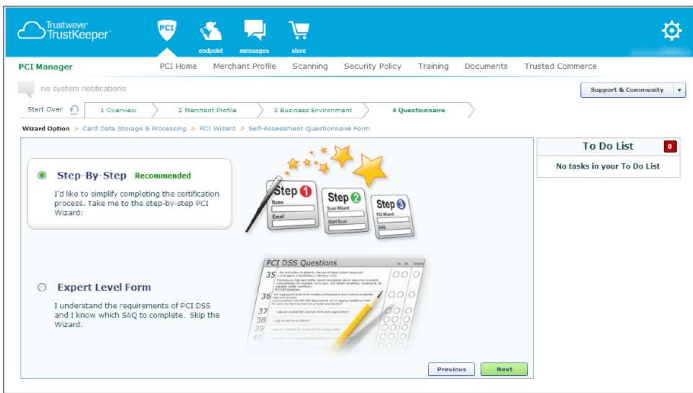

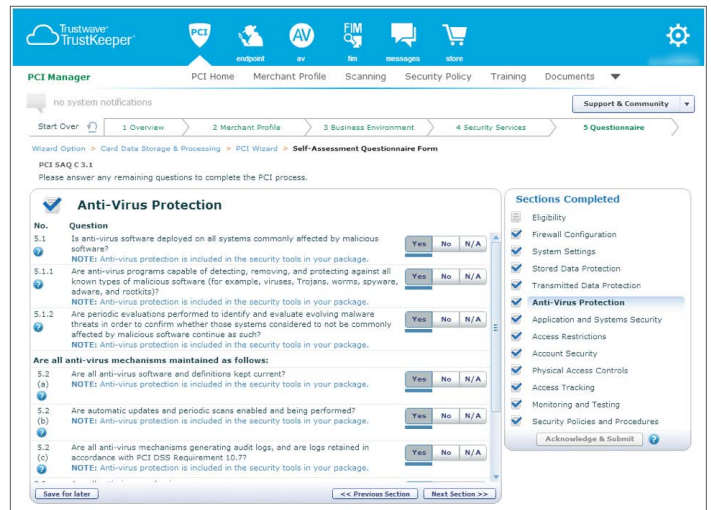

PCI Manager with the SMB Security Toolkit simplifies the process for you by presenting a pathway that's customized to your business. Trustwave's intelligent PCI Wizard guides you to the appropriate self-assessment questionnaire and walks you step-by-step through the process of certifying PCI DSS compliance, even prefilling some of the questions for you.

By beginning with security best practices, many of the SAQ security questions can be prefilled as shown here.

## Become and Stay Compliant

After you have completed the streamlined compliance process with PCI Manager and the SMB Security Toolkit, PCI Manager will facilitate reporting your compliance status back to your acquiring bank or program sponsor automatically on your behalf. You can view and download milestone progress reports, download a Certificate of Compliance as well as the PCI Attestation of Compliance. You can display the TrustedCommerce® seal on your website to showcase your compliance to visitors.

And when it comes to annual renewals, PCI Manager Express Renewal helps you easily make updates where necessary and update your certification in a fraction of the time; sometimes as little as 10 minutes.

PCI Manager with the SMB Security Toolkit helps you become and stay compliant.
