

DATA SHEET

Certified Database Security Partner

▶ TRUSTWAVE PROGRAM

Working together to make database security better for more customers in more places. Become our service partner – and provide the implementation, consultation, and training services that customers require to maximize ROI from their Trustwave database security solutions. And take advantage of a substantial opportunity – as services make up a critical component of Trustwave’s database security solution delivery.

Partnerships Mean Added Strength

That’s why our partner program is an essential part of the solutions strategy at Trustwave. We continue to build relationships with companies whose software implementation, database experience, and services complement our own, helping us provide stronger database security solutions for customers around the world.

Successful implementations of Trustwave solutions enable our customers to realize and maximize the value of their Trustwave investments. Trustwave has developed a global community of Services Partners who provide high quality implementation and related services that augment and extend the services offered by Trustwave.

Services Partners work closely with Trustwave to provide our customers with deep industry vertical experience, security best practices as well as functional and technical product expertise and related implementation services supporting the full Trustwave product portfolio in the global geographies and target markets Trustwave serves.

Bring Your Specific Expertise to Help Our Customers Run Better

Become a Certified Database Security Partner (CDSP) in just 5 days. Learn how to implement DbProtect, create customized policies, and help companies operationalize Trustwave’s database security solutions.

A Certified Database Security Partner

- Has in-depth DbProtect knowledge
- Can implement DbProtect
- Has software implementation experience
- Has experience working with common database platforms

Subjects

- Secure Path Methodology
- DbProtect Implementation
- Vulnerability Assessment Installation & Administration
- Rights Management
- Database Activity Monitoring Installation & Administration
- Reporting & Analytics

Locations

CDSP Training courses are currently offered in:

- Chicago, IL
- New York, NY
- London, UK
- São Paulo, Brazil
- Sydney, Australia

Other regional locations may be available for training, please contact your account manager for details.

Computer-based training options are currently not available for this course.

Results

Participants who have attended the partner training and passed the exam are entitled to use the Trustwave Certified Database Security Partner (CDSP) designation.

Approach

Our approach is learning by doing. Our expert trainers provide an intensive and hands-on learning environment as well as engaging business cases that will provide you with the right insights to accelerate business. All participants will access the Trustwave tools during the course to put newly gained knowledge into practice on the spot. There will be lots of opportunity to ask questions and exchange experiences with peer users and Trustwave's management team.

After completing this course, participants will have a clear understanding of Trustwave's DbProtect platform, implementation methodology, and operational models.

Participants will learn to use DbProtect basic and advanced functionality, and install, configure, and deploy all components.

Participants will learn how to customize policies, rules, checks, filters, org structures, and leverage built in analytics and reporting capabilities. Participants will also learn how to review identified vulnerabilities, user privilege entitlements, and suspicious activity detection through analytics, alerts, and reports.

Participants will take the exam after the course is completed. The hands-on, practical skills/knowledge exam covers all aspects of the material. The exam includes DbProtect screenshots and real-life exercises using DbProtect.

Participants

This training targets software implementation consultants and database security specialists of companies that are actively seeking Trustwave services partner authorization. Participants should have experience with software implementation, information security best practices, and a working knowledge of databases. Since the training is hands-on, there is a maximum of 5 participants per session.

Costs

\$1,500 per participant (excl. taxes/VAT, where applicable).

Registration

You can register up to two weeks before the training.

Contact

If you have any further questions or wish to register for a class, please send an e-mail to CDSPtraining@Trustwave.com or contact your account manager for more details.
