

# Trustwave Solutions for Microsoft Security Services

NAVIGATE TODAY'S THREATS WITH A MICROSOFT PARTNER YOU CAN TRUST.

## Benefits

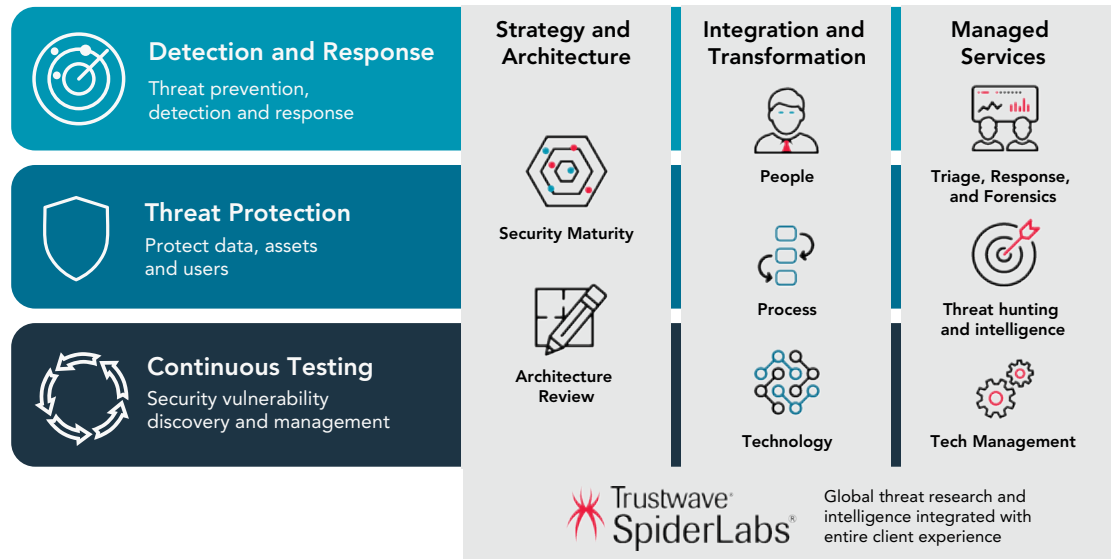

- Comprehensive network, endpoint, and data ingestion for **full threat surface visibility**
- Timely and effective 24x7 threat detection
- Expert incident and threat response, augmented by automation
- **Threat hunting** informed by world-class Trustwave SpiderLabs threat intelligence
- **Accelerated time-to-value** by leveraging the Microsoft Security tools already available as part of your Microsoft 365 License

Trustwave is recognized as a global security leader in managed security services (MSS) and managed detection and response (MDR). With more than 2,000 security-focused professionals operating on behalf of clients across 96 countries, Trustwave helps organizations across the globe detect and respond to threats in the hybrid multi-cloud world.

In response to our clients' challenges, we provide:

- Detection and Response – including designing and advancing clients' internal cyberthreat operations, adding 24x7 monitoring capacity, and fighting the everyday fires.
- Threat Protection – helping clients establish and implement controls that protect data, assets, and users.
- Continuous Testing – understanding organization risks in today's ever-evolving attack surface to discover, manage and remediate vulnerabilities.

## Cyber resilience for the hybrid multi-cloud world

We combine decades of experience integrating and managing clients' security technologies with Trustwave SpiderLabs, an elite team of analysts, threat hunters and investigators, operating from a global network of security operations and research centers. In addition to their daily duties investigating malware and major vulnerabilities, Trustwave SpiderLabs team members study web clients and servers, emails, databases, and applications. Trustwave SpiderLabs researchers are sought-after speakers, trusted media sources, published authors, and leaders of major industry projects.

### Trustwave Highlights

- 2,000+ Security-focused employees worldwide, including...
- 250+ threat hunters, ethical hackers, investigators and researchers in Trustwave SpiderLabs
- Global client footprint spans 96 countries
- 9 Security Operations Centers
- 6 Trustwave SpiderLabs research centers
- 25+ years of experience

### Trustwave Partnership with Microsoft

Trustwave launched Microsoft as a Platinum Technology Partner in 2019, committing to building market-leading Threat Detection & Response offerings that leverage and support the Microsoft set of security solutions. In addition to building market-leading offers with Microsoft solutions, Trustwave is:

- A registered Microsoft solution provider for Managed Detection and Response (MDR)
- One of Microsoft's first Managed Security Services Provider (MSSP) partners for Microsoft Azure Sentinel
- Microsoft Security 20/20 award winner for the Top Managed Security Operations Center (SOC)
- A member of the Microsoft Intelligent Security Association (MISA)
- Featured by Microsoft for our Microsoft Graph Security partner solutions
- Microsoft Active Protections Program - Top Contributor of Threat Indicators (First Place)
