

SERVICE DESCRIPTION

Security Awareness Education (SAE) – Client Hosted Portal

Security Awareness Education (SAE) – Client Hosted Subscription

Trustwave will deliver the entire Security Awareness Education (SAE) Content Library to Client in SCORM 1.2-conformant packages. These packages can be published to the Client's internal Learning Management System (LMS) for hosting, tracking and reporting.

Trustwave's SAE content library is licensed to a number of individual participants per year. Licenses are counted annually so that accounts removed in a previous year do not count toward the following year's total.

Client may license the entire SAE content library per learner (user) on an annual subscription basis. Access to the entire SAE content library is unlimited during the annual subscription period.

Security Awareness Education (SAE) - Content Library

Trustwave Security Awareness Education (SAE) solution is comprised of a comprehensive library of security awareness lessons. These lessons can be sequenced to create role-specific courses that meet the needs of a wide variety of organizations. Refer to the *Security Awareness, Training & Education Catalogue* for the most current listing of courses and languages available in the library.

Posters

Trustwave will provide multiple styles of print-ready electronic posters to Client. Posters are designed as supplemental material to the online security awareness courses.
