

## SERVICE DESCRIPTION

# SpiderLabs Trusted Security Advisor

---

## Service Scope

Trustwave's SpiderLabs has members that are world-renowned experts in application security, network security, forensics, physical security and social engineering. The team publishes research papers, provides speakers at leading industry events such as BlackHat, DEFCON and AppSec, and annually gathers data for Trustwave's Global Security Report.

Customers can elect to have a senior manager within SpiderLabs as a Trusted Security Advisor who becomes a virtual extension of the corporate security team. This expert can be available for security strategy sessions, vendor evaluations, compliance reviews and executive briefings. As appropriate, the Trusted Security Advisor will bring in members of the SpiderLabs team as subject matter experts.
